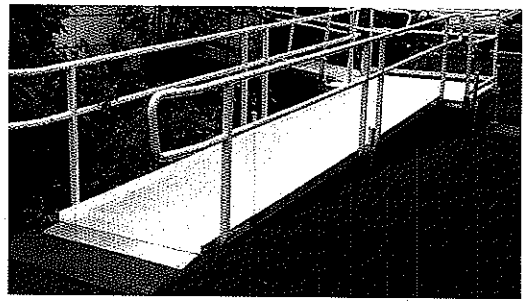
The Ramp Rebuild, Replacement and Installation Program provides custom built modular ramps made from metal, wood or fiberglass to eligible applicants. Installation can take a few days or a week depending on the project.



Applicants must provide proof of loss or demonstrate need, as a result of Superstorm Sandy and present a medical certification confirming the presence of a disability that requires a ramp.

Individuals interested in applying for the Ramp Rebuild, Replacement and Installation Program can call the New Jersey Department of Human Services' Division of Disability Services (DDS) at 1-888-285-3036. Ramps will be built for eligible applicants until the funding is exhausted.

Program Scope:

Funding is available to replace, repair or build modular ramps for individuals who require one at their Sandy-impacted primary residences.

Projects:

DDS is considering applications that fall into one of the 3 categories below:

- A ramp was damaged due to the storm and needs to be repaired or replaced.
- A ramp is needed in a home or apartment because a person with a disability has relocated as a result of the storm, even temporarily.
- An existing ramp is no longer useful because a home has had to be elevated to comply with new building codes.

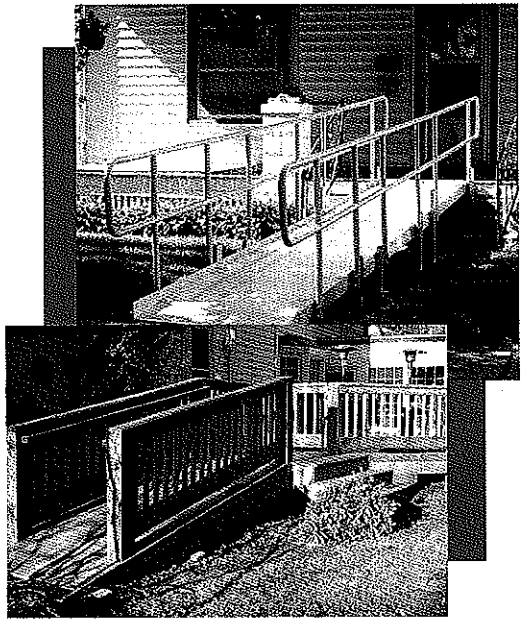
Applicants Must:

- Reside in New Jersey.
- Have a permanent disability that requires a ramp. Physician certification of disability and need is required.
- Show proof of home ownership or have written permission from landlord.
- Provide proof of loss as a result of damage from Superstorm Sandy.

- Demonstrate that all other sources of payment (e.g., Insurance, FEMA) are unavailable or exhausted.

Modular Ramp Design:

- Modular ramps have no permanent footings, making them easy to install, remove, and relocate as necessary.
- Ramps may be made of wood, aluminum or steel or fiberglass. Design options are customized for each home and the needs of each applicant.



For Information or an Application:
